4'-Chloro-Biphenyl-2-Ylamine Specification

Chemical Name 4'-Chloro-Biphenyl-2-Ylamine

Molecular Formula C₁₂H₁₀ClN

Molecular Weight 203.67

Structure

CAS Number 1204-44-0

Specification Appearance off-white to pale beige solid

Melting point °C 45-49

Assay % HPLC ≥98.0

Packing 25kg/fiber drum

Applications It is an important intermediates in the synthesis of boscalid.

Edition Date: Aug.19, 2024

Modified Date: Aug.19, 2024
