CSFC NTCDA

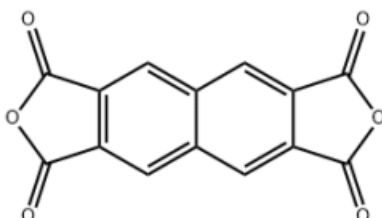

Specification

Chemical Name 2,3,6,7-naphthalenetetracarboxylic acid dianhydride

Molecular Formula C₁₄H₄O₆

Molecular Weight 268.18

Structure

CAS Number 3711-01-1

Specification	Appearance	white Powder
----------------------	-------------------	--------------

Assay %	99.0min
----------------	---------

Single impurity(Monoanhydride)	0.5 max
---------------------------------------	---------

Volatile Content %	0.5 max
---------------------------	---------

Ash Content %	0.3 max
----------------------	---------

Packing	25 kg net/bag
----------------	---------------

Applications	It is used as high-performance photoresist electronic materials.
---------------------	--
